Static Changeover Units are essential components in a Switch Maintained Static Inverter System, enabling Emergency Luminaires to be powered by a Local Switched Supply during normal operation.

In the event of a Local Supply failure, the Changeover Units switch the Luminaires to the Static Supply, ensuring uninterrupted emergency lighting. This critical functionality ensures the safety and security of occupants in a building during power outages.

## Materials

Housing: Un-Painted Folded Steel

## Warranty

Standard Warranty: 6 Years  
 Alternative Warranty: 10 Years  
 Add /10Y to Order Code

| Number of Monitored Circuits | Order Code  | Mode of Operation | Dimensions (mm) |     |    |
